

Where in the World?

Topic words	
Continent	A continent an area of the land that is made up of lots of different countries.
Africa	The name of the second biggest continent in the world.
Habitat	A habitat is the home of an animal or a plant. Almost every place on Earth, from the hottest desert to the coldest ice pack is a habitat for some kinds of animals and plants.
Rainforest	A type of habitat. Rainforests are forests with tall trees, warm climates, and lots of rain
Savanna	This habitat is like a grassland, but also has some trees. Savanna's have a dry season when wildfires are common.
Desert	A desert is any large region that gets very little rain each year. Very few plants or animals live in desert areas.

By the end of this topic.....

- * I will be able find Africa on a world map.
- * I will understand Africa is made up of lots of countries.
- * I will understand what a habitat is.
- * I will be able to name and describe different habitats within Africa.
- * I will be able to name and talk about African animals and food.

Curriculum Links

Understanding the World - The World 30-50 months - Comments and asks questions about aspects of their familiar world such as the place where they live or the natural world.

Talks about why things happen and how things work. Shows care and concern for living things and the environment

ELG - Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur and talk about changes.
